NEW SITE INFRASTRUCTURE AT THE EAGLE GOLD MINE

New site infrastructure at the Eagle Gold Mine: fixed conveyor, truck shop and water treatment plant.

Over the winter, the Eagle Gold Mine construction team was busy developing new infrastructure at site including a **new truck shop, conveyor extension and water treatment plant.**

“Since the Eagle Gold Mine started production in the Fall of 2019, the Victoria Gold team has gained experience operating through three winters to evaluate our operations and assess efficiencies,” says Victoria Gold President & CEO John McConnell.

Construction of the site’s new **truck shop** commenced in the second quarter of 2021 and is now complete. It was designed and built with four full-size maintenance bays and one wash bay; each sized to accommodate the largest mobile equipment on site.

“The truck shop is an invaluable asset for our maintenance team giving them additional resources to keep the Eagle Gold Mine’s equipment running,” continues McConnell.

A **fixed conveyor** was also installed over the winter to support ore stacking to the upper areas of the mine’s heap leach facility (HLF). This additional conveyor was successfully constructed, commissioned and tied into the existing conveyance system over a six-week period.

Approximately 180 m long and sized to transport crushed material at a rate of up to 2,400 tonnes per hour, the new conveyor will feed ore directly onto the in-pad mobile stacking system for the next 18 to 24

months (until a new conveyor is installed).

With the additional fixed conveyor complete, the team is now fully dedicated to constructing the site’s new **Water Treatment Plant (WTP)**. Construction of the concrete foundations is underway and commissioning is scheduled for August with operation to commence shortly thereafter. The WTP will treat mine contact water for discharge, as per the mine’s operations permits, and will treat an average 8,500 cubic m per day with peak flows of 13,900 m per day.

“This new Water Treatment Plant ensures that we meet our discharge requirements even in the most extreme weather events and with very high protection of the environment,” adds McConnell.

VICTORIA GOLD IS PROUD TO HAVE YUKONERS AT WORK

IF YOU ARE A YUKONER WITH MINING EXPERIENCE, WE ENCOURAGE YOU TO CONNECT WITH US.

Victoria is currently hiring tradespeople, equipment operators, process/crusher operators and other positions to work at the Eagle Gold Mine. Visit the “Work For Us” page on our website at vgcx.com/contact/work-for-us/ and send your resume to greatpeoplework@vgcx.com.

ABOUT VICTORIA GOLD & THE EAGLE GOLD MINE

The Eagle Gold Mine is situated within Victoria Gold’s 100 per cent-owned Dublin Gulch Property located approximately 375 kilometres north of Whitehorse and 85 kilometres north, northeast of the Village of Mayo within the traditional territory of the First Nation of Na-Cho Nyak Dun. The property is accessible by road year-round and is connected to Yukon Energy Corp’s electrical grid. The mine is a significant contributor to the Yukon economy employing 350-400 people.
